

UK Microwave Group

Press Release

Free Magazine for Under-21s

The UK Microwave Group (UKuG) is pleased to announce a new and innovative initiative which is available to any student under the age of 21.

The UKuG produces ten copies of its flagship publication 'Scatterpoint' each year and through this initiative is offering to deliver all ten copies free of charge each year to students under the age of 21 via electronic mail.

Microwave technology and its diverse, associated applications (including wireless communications, WLAN, WiMax, satellite / space communications, radar etc.) are really in vogue these days and many youngsters are expressing interest in and experimenting with microwaves through amateur radio.

Underpinning this tremendous growth in popularity of microwave amateur radio the UK regulator OFCOM has recently granted permission for amateur radio foundation license holders to operate microwave amateur radio equipment on the 10GHz frequency band and has also granted permission for intermediate license holders to operate on the higher microwave frequency bands. The UKuG is also running regular beginner's workshops.

To register for, and take advantage of this initiative please send an e-mail to the UKuG secretary at ianlamb@btconnect.com stating your name, date of birth, postal address, contact telephone number and e-mail address.

The UKuG continues to celebrate its growth and success as the representative voice of amateur radio microwave enthusiasts in the United Kingdom.

A handwritten signature in blue ink, appearing to be 'Ian Lamb'.

Ian Lamb
